

Hariharan Elangovan

Data Science professional experienced in building ETL pipelines, machine learning models, and interactive dashboards. Improved data accuracy by 25% and automated workflows saving 20% time using Python, SQL, and Power BI. Seeking Data Analyst/Junior Data Scientist role.

EXPERIENCE

Data Science & AI Trainee | 360DigiTMG, Chennai

Jun 2024 - Aug 2025

- Mastering KPI automation using Excel & SQL to boost reporting efficiency
- Developing ETL pipelines for streamlined analytics automation
- Building client-facing Power BI dashboards for data-driven decisions
- Gaining hands-on ML model deployment experience with Flask

Data Science Intern | VCODEZ, Chennai

Mar 2025 - Jun 2025

- Implementing data preprocessing & quality checks for computer vision models
- Supporting AI/ML solution deployment and model development
- Creating computer vision models with actionable dashboard insights
- Collaborating with teams to align analytics with business objectives

PROJECTS

MILITRANS: AI-Powered Multilingual Translation | Python, NLP, OCR, Transformers, Streamlit

- Built AI translation engine with OCR integration, **reducing training delays by 40%**
- Implemented data quality checks and metadata management for translation datasets
- Deployed using **Streamlit** with **MongoDB** backend for real-time translations

Workplace Activity Recognition System (Python, YOLO, TensorFlow, OpenCV, Streamlit)

- Real-time activity recognition using **YOLOv8 & TensorFlow** for accurate monitoring.
- OpenCV**-based pipelines for efficient video frame processing reduced video processing delay by 30%.
- Streamlit** dashboard for activity visualization and workplace insights.
- Data preprocessing & transfer learning to boost model accuracy

Sales Performance Analytics Dashboard | Power BI, Excel, SQL

- Developed **interactive dashboard** tracking sales KPIs (revenue, profit, regional performance)
- Automated data analysis workflows** supporting faster business decision-making
- Implemented **customer segmentation** for sales strategy optimization

TECHNICAL SKILLS

Programming & Databases

- Python (Pandas, NumPy, Scikit-learn)
- SQL (MySQL, PostgreSQL)
- MongoDB

Machine Learning & AI

- Machine Learning
- Deep Learning (TensorFlow, PyTorch)
- NLP & Computer Vision
- Predictive Modeling

Data Engineering & BI

- ETL/ELT Pipelines
- Data Preprocessing
- Power BI · Tableau · Excel
- Data Governance

Cloud & DevOps

- AWS EC2 · Google Cloud
- Docker · Git
- Flask · Streamlit

EDUCATION

B.Sc. Information Technology

CGPA: 7.94/10 | 2024

Bharathidasan University

CERTIFICATIONS

Artificial Intelligence Diploma

State University of New York (SUNY)

Data Science & AI Program

360DigiTMG

Python for Data Science
